

Prime Trail Mix

Make this tasty snack to enjoy, but before eating experiment with the Number Devil's trick...

"Take any even number- anyone at all, so long as it's larger than two- and find two prima donnas that add up to it." (pg. 62)

"It works with odd as well as even numbers. Think of a number, any number, so long as it's bigger than five... You can find prima donna numbers that add up to them too, only instead of two you'll need three." (pg. 64)

Use your trail mix as manipulatives to find the answers.

2- Chocolate Covered Pretzels

3- Mini Cookies

5- Dried Apricots
