

Tired of dreaming crazy dreams every night, Robert felt relieved when the Number Devil visited him in his sleep. Do you remember your dreams? Are they crazy? For the next 10 days plot the number of dreams you remember having each night on a line graph. Be sure to label the abscissa (the x axis) and the ordinate (the y axis) and give your graph a title. At the end of the 10 days calculate the average number of dreams you had each night. If you remember any crazy dreams you'd like to remember, jot them down on the back of this page.

The most dreams I remember having in a night was _____.

The fewest dreams I remember having in a night was _____.

The average number of dreams I remember having was _____.
